

# Things That Use A Lot Of Water At Home

## 2. Using too much Water

Water is not too expensive if we use it responsibly

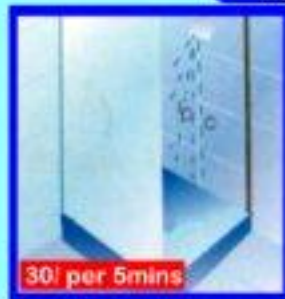

### Big water users

Washing Dishes

Washing Hands

Taking A Shower

Washing Dishes In Unblocked Sink.

Flushing Toilets

Leaking Taps

Washing A Car

Taking A Bath

## Water supplied to your house costs money

Pay your bill every month so that you don't end up with a huge bill (arrears).

REPORT ALL LEAKS ON ROADS AND ON VERGE  
TO THIS NUMBER: 60408 / 65573

Acknowledgements: Ethokwini Water Services

## Who pays for the leaks?

Leaks and repairs inside your property and after the meter must be fixed and paid for by the property owner. If you rent a house get the owner to fix the leak as soon as possible. Keep your account up to date and avoid water cuts for non-payment.

Engineering Department is responsible for leaks and repairs **OUTSIDE** your property and **BEFORE** the meter.

## 3. Not paying bills every month

Water is only free when it falls from the sky.

You can fix the leak yourself, or you can obtain the services of a qualified plumber or request the Engineering Department to fix the leak at a charge.

## Why do we have to pay for water?

I pay my water bills because I get supplied with clean water which comes to my house. I pay every month because I support my council in it's efforts to supply us with safe water.

## What do we mean by Water Rationing limits?

All individually metered houses (Eastern Suburbs) = 400 litres / day  
All individually metered houses (Western Suburbs) = 350 litres / day  
All residential flats with individual meters = 350 litres / day  
Cottages = 250 litres / day

# Water Saving made easy

## Help I have a huge bill. Why?

There are three possible reasons

Leaks

Using too much water.

Not Paying bills every month

## 1. Leaks

Step 1. Take a meter reading  
Step 2. Turn off taps and do not flush the toilet  
Step 3. Wait for ten minutes  
Step 4. Take a meter reading again

If the reading has changed then water has passed through your meter and you have a leak

Do a meter reading and check for leaks

## Below ground?

## Where is it? Tips for finding leaks

You need to fix the leaks as soon as possible so you don't waste water and accumulate a huge bill.

## Above ground?

For above ground leaks look for dripping taps or leaking toilets. For underground leaks look for wet patches or green grass.

Engineering Department, 5th Floor, Tower Block
